

Merge1 Microsoft Bundle

Capture and archive Microsoft communications: Yammer, SharePoint Online, MS Teams, Skype for Business and OneDrive.

Empower Compliant Teamwork And Collaboration Across Your Microsoft Applications

Merge1's Microsoft Bundle helps companies easily archive communications taking over SharePoint, Skype for Business, Microsoft Teams, OneDrive and Yammer for Compliance and eDiscovery.

As the world's most popular content management, collaboration and content sharing platform, Microsoft Office 365 applications have provided more convenience and productivity for the workforce than any other technologies available today. With the growing set of content being stored and shared on Microsoft Office 365 applications, the regulatory mandates for mediums like MS Teams, SharePoint, Yammer, etc. have also increased.

Veritas Merge1's advanced compliance and robust capture solution could save your company a substantial amount of time and money. This powerful tool does not need any supervision and will continuously archive communications taking over all apps. Merge1 gives you the capability to tag individual documents or key words to enhance future search results. What may have taken weeks or months in the past can be significantly condensed.

Veritas Merge1 is essentially the only universal message ingestion engine on the market today. While other products and services claim to offer similar functionality, Veritas Merge1 stands alone as the most mature and proven solution for ingestion of multiple message types, while simultaneously offering the flexibility of user-defined templates and rules, with the ability to import the data into any archive.

"Merge1 is truly a pioneer product in the compliance space. It's an easy to set up solution for our many complex problems. The support team is top notch as well."

Bo He,
Vice President, KKR

Yammer

Communications taking place over Yammer can easily be archived when adding Merge1 to your existing infrastructure. As opposed to other archiving compliance solutions, which require sending your workforce's critical, sensitive communications to a third-party data store, Merge1 captures Yammer communications and stores them in your existing email archive, whether on-prem (e.g. Veritas Enterprise Vault) or in the Cloud (e.g. Microsoft Office 365).

Skype for Business

Merge1 captures Skype for Business communications and stores them in your existing email archive, whether on-prem (e.g. Veritas Enterprise Vault) or in the Cloud (e.g. Microsoft Office 365). Skype for Business

offers secure meetings and video conferences with up to 250 simultaneous users. It integrates with the Microsoft Office 365 suite of applications, including Outlook, Word and PowerPoint.

OneDrive

Merge1 helps archive files from the OneDrive for Business Bundle-sharing platform into your existing email archive. Whether you need to archive and centralize your Cloud-based files for compliance, eDiscovery or Info Governance, Merge1 facilitates the archiving of your OneDrive for Business files and documents.

MS Teams

Communications taking place over Microsoft Teams can easily be archived when adding Merge1 to your existing infrastructure. As opposed other solutions, which require sending your workforce's critical, sensitive communications to a third-party data store, Merge1 captures Microsoft Teams communications and stores them in your existing email archive.

SharePoint

The hefty communications taking place over Microsoft SharePoint can easily be archived when adding Merge1 to your existing infrastructure. Merge1 will extract any les that have been integrated into SharePoint through collaboration. You can now archive any replies, blog posts, like, comments and documents within your SharePoint communications for compliance and eDiscovery needs.

Works With Any Archive Including Your Existing Infrastructure

- **Archive Agnostic:** Compatible with any archive, including Office 365.
- **Fully Customizable:** Can be customized to support any content, including proprietary content sources.
- **On-Prem or SaaS:** Run Merge1 on-premise or subscription based.
- **Designed for Simplicity:** No training required. Small footprint. Runs on existing infrastructure. Quick setup.
