YOUR SOC BY PERFORMANCE

ADVANCED & AFFORDABLE

Your Security Operations Center for a fraction of the cost

At Performance Technologies, we have designed and we operate an out-of-the-box Security Operations Center (SOC) to manage and monitor security around the clock, effectively eliminating the gaps for a cyber threat to sneak through.

We provide a centralized operations center to help organizations identify, investigate, prioritize, and resolve issues that have the potential to affect the security of their critical infrastructure and data across their on-premises, cloud, and hybrid cloud critical infrastructure.

We offer real-time threat detection and incident response to any identified attack, along with insights on how the attack is being executed, and what systems or data are being compromised.

THREATS NEVER STAND STILL – AND NEITHER SHOULD YOU

The Performance Technologies Security Operations Center help organizations reduce the complexity in managing security, performance, and compliance with a comprehensive, single-pane-of-glass approach that provides enterprises and CISOs with greater visibility and control over their current and desired risk posture.

The adaptive, scalable, and holistic view of the threat landscape and global threat intelligence, along with real-time, cross-correlated NOC and SOC analytics, enables enterprises to more rapidly detect and respond to threats and focus on remediation efforts.

SOC KEY OFFERINGS

SECURITY OPERATION SERVICES

- 24x7 Monitoring
- AI-driven Threat Intelligence
- Real Time Cross Correlation of SOC and NOC Analytics
- Automated Incident Mitigation
- Network, Virtualization, and Application Intelligence
- In-Depth Database Security, Availability, and Anomalous Activity Monitoring
- Compliance Automation
- Ongoing Rule Tuning and False Positive Reduction
- Enriched Notifications Including Response Guidance

- Integrated 3rd Party Threat Feeds
- Pre-Built Compliance and Standards-Based Reports
- Custom Report Creation and Scheduling
- Audit Support
- Pre-Tuned Rules Matrix and Customized Rules for Your Organization's needs
- Remediation access: Can respond automatically with remediation scripts or custom actions
- Case Management: Manage and document incident investigation with built in case management

NETWORK OPERATION SERVICES

- 24x7 Monitoring
- Comprehensive Device Support
- Performance Monitoring
- Availability Monitoring

- Configuration Change Management
- Automated Infrastructure Discovery and Application Discovery Engine (CMDB)
- Automated Alerts and Notifications

It's not a matter of "if" but of "when" a breach will happen

We help you act in a timely manner and reduce the costs of recovering from such incidents by offering important proactive elements such as the following:

— Security Awareness Trainings
— Patching Best Practices (OS and 3rd Party Software)
— Network and Systems Security Hardening
— Phishing Simulation Attacks
— Dark Web Monitoring for Leaked Credentials

— Endpoint and Network Management
— Endpoint EDR Security
— DNS Filtering
— Privilege Access Management
— Security Policies Generation and Enforcement
